33-300 Nowy Sącz

HARD SKILLS

Postman (collections, environment, tests)

DevTools

Linux Terminal

Git

Android Studio

DBeaver (basic SQL)

Charles / Fiddler

LANGUAGE

Russian native language

Ukrainian native language

Polish intermediate

English intermediate

EDUCATION

Jan 2023 - Jul 2023

Author's course by Vadim Ksendzov
«Software Testing»

Jan 2023 - Jul 2023

Stormnet Technologies "Software Testing Course"

2006 - 2008

Kherson State University

Physics and technology of materials and components of electronic equipment

SUMMARY

I have a deep understanding of the software development life cycle and a wide range of testing techniques, including functional, regression, UI/UX, and exploratory testing

I am skilled at writing detailed test cases and test plans, and thoroughly documenting identified defects. Proficiency in Test Analysis, Bug Detection, Defect isolation, and Report generation

My critical thinking, analytical skills, and attention to detail allow me to effectively identify and debug application defects, ensuring high quality and product reliability. I am a confident user of various testing tools and technologies such as Postman, Charles, JIRA, Linux Terminal, and others

WORK EXPERIENCE

Feb 2022- Present

QA Engineer ITX Company

- Perform Web and mobile(Android and iOS) testing: Smoke testing, Regression testing, Re-tests, UI/UX, and Localization testing, Ad-hoc, Exploratory testing
- Creation, maintenance, and execution of checklists, test cases, and bug reports
- Analysis of the root causes of defects and their localization
- Conducting compatibility testing in various browsers (Chrome, IE, Firefox, and Safari)
- Regular communication with the team and providing test reports

May 2022 - Present

Tester, Freelance

- Writing checklists for smoke, critical path, and regression testing applications
- Web and Mobile application testing (Android application)
- Providing bug reports
- Localization testing
- Cross-browser and cross-platform testing
